ANNUAL REPORT  
December 31, 2024

December 31, 2024

**Dear Shareholder:**

We are pleased to present this Annual Report covering the activities of the Credit Suisse Asset Management Income Fund, Inc. (the "Fund") for the 12-month period ended December 31, 2024 (the "Period").

**Performance Summary**

1/1/2024 – 12/31/2024

**Fund & Benchmark**

Total Return (based on NAV)<sup>1</sup>

Total Return (based on market value)<sup>1</sup>

ICE BofA US High Yield Constrained Index (the "Index")<sup>2</sup>

**Performance**

9.86%

0.74%

8.20%

---

<sup>1</sup> Assuming reinvestment of distributions.

<sup>2</sup> The ICE BofA US High Yield Constrained Index is an unmanaged index that tracks the performance of below investment-grade U.S. dollar-denominated corporate bonds issued in the U.S. domestic market, where each issuer's allocation is limited to 2% of the Index. The Index does not have transaction costs and investors cannot invest directly in the Index.

**Market Review: A positive period for high yield assets**

The Period was positive for the high yield asset class. Overall, the ICE BofA US High Yield Constrained Index, the Fund's benchmark, gained 8.20% for the Period. Following a difficult cycle of tightening financial conditions in the prior year, 2024 saw modest disinflation and the realization of U.S. Federal Reserve (the "Fed") rate cuts. Longer-term U.S. treasury yields were volatile, however, and had a negative impact on high yield returns in general. Still, high yield spreads tightened meaningfully throughout the year, helping overall returns to exceed the prevailing coupon levels. Thanks to a resilient U.S. economy, a shift in Fed policy, and favorable market technicals, the Index experienced only three months of negative returns during the Period. The 10-year U.S. treasury yield got as low as 3.6% in September 2024, but finished the Period at 4.6%, 69 basis points wider than the prior year. Yields within the Index decreased and ended the Period at 7.41%—23 basis points tighter than on December 31, 2023—and spreads tightened to +308 basis points versus +362 basis points.

For the Period, CCC-rated bonds significantly outperformed the Index, gaining 16.4%. Conversely, B-rated and BB-rated bonds underperformed the Index, returning 7.7% and 6.4%, respectively.

From an industry perspective, auto loans, pharmaceuticals, and trucking & delivery were the best performing sectors, returning 20.4%, 20.1% and 16.3%, respectively. In contrast, the worst performing sectors included managed care, media-diversified, and non-electric utilities, returning -0.6%, +3.6% and +3.7%, respectively.

Default rates were well below long-term historical averages in the high yield bond market. According to JP Morgan, the trailing 12-month default rate, including distressed exchanges, ended the Period at 1.5%—down 141 basis points since the end of 2023. High yield default activity remains muted due to conservative balance sheets, active capital markets and limited near-term maturities for stressed companies.

High yield market technicals have been favorable due to the limited net new supply of bonds, as well as a consistent reinvestment of coupons and positive fund flows. For the Period, high yield mutual funds saw inflows of \$16.4 billion—which compares to \$7.0 billion of outflows in 2023.

As referenced above, capital markets have been open and busy, but refinancings are the primary purposes for those deals. During the Period, new issue volume totaled \$288.8 billion, with just \$70.9 billion in non-refinancing activity. In comparison, 2023 saw \$176.1 billion of total volume, of which \$59.5 billion was non-refinancing activity.

**Strategic review and outlook: Cautiously optimistic moving forward**

For the Period, the Fund outperformed the Index on an NAV-basis. From an asset class perspective, an allocation to collateralized loan obligations contributed to relative returns while bank loans detracted. Industry-wise, security selection in basic industry, capital goods and healthcare added the most to relative returns, while selection in technology & electronics hurt returns. Within ratings, an overweight in CCC-rated positions and security selection in BB-rated issues both contributed to relative returns.

The high yield market has generated strong returns following the rate hike shock of 2022. While inflation metrics look better, the U.S. consumer has faced a tough few years of rising prices. It appears the economy is stable but may be vulnerable to a slowdown in consumer spending as well as the lagging impact of tight financial conditions—given that the general cost of capital remains high relative to the world after the great financial crisis. Still, within the high yield market, we see healthy balance sheets well-suited for a period of slower growth and few signs of broad deterioration in credit profiles.

We are cognizant of several other key risks to markets—namely geopolitical tensions and uncertainty from a new administration in Washington. However, the soundness of issuer capital structures gives us comfort, and, in our view, the high yield asset class offers attractive risk-adjusted return potential.

John G. Popp  
Chief Investment Officer\*

Omar Tariq  
Chief Executive Officer and President\*\*

---

\* John G. Popp is a Managing Director of UBS Asset Management (Americas) LLC (“UBS AM”) and Group Head and Chief Investment Officer of Credit Investments Group (“CIG”), with primary responsibility for making investment decisions and monitoring processes for CIG’s global investment strategies. Mr. Popp also serves as Trustee of the Credit Suisse open-end funds, as well as serving as Director and Chief Investment Officer for the Credit Suisse Asset Management Income Fund, Inc. and Trustee and Chief Investment Officer of the Credit Suisse High Yield Bond Fund.

\*\* Omar Tariq is an Executive Director of UBS AM. Mr. Tariq also serves as Chief Executive Officer and President of the Credit Suisse open-end funds, the Credit Suisse Asset Management Income Fund, Inc. and the Credit Suisse High Yield Bond Fund.

---

*High yield bonds are lower-quality bonds that are also known as "junk bonds." Such bonds entail greater risks than those found in higher-rated securities.*

*In addition to historical information, this report contains forward-looking statements, which may concern, among other things, domestic and foreign markets, industry and economic trends and developments, and government regulation, and their potential impact on the Fund's investments. These statements are subject to risks and uncertainties and actual trends, developments and regulations in the future, and their impact on the Fund could be materially different from those projected, anticipated or implied. The Fund has no obligation to update or revise forward-looking statements.*

*The views of the Fund's management are as of the date of this letter and the Fund holdings described in this document are as of December 31, 2024; these views and Fund holdings may have changed subsequent to these dates. Nothing in this document is a recommendation to purchase or sell securities.*

**Comparison of Change in Value of \$10,000 Investment in the  
Credit Suisse Asset Management Income Fund<sup>1</sup> and the  
ICE BofA US High Yield Constrained Index<sup>2</sup> For Ten Years**

<sup>1</sup> Assuming reinvestment of distributions.

<sup>2</sup> The ICE BofA US High Yield Constrained Index is an unmanaged index that tracks the performance of below investment-grade U.S. dollar-denominated corporate bonds issued in the U.S. domestic market, where each issuer's allocation is limited to 2% of the Index. The Index does not have transaction costs and investors cannot invest directly in the Index.

**Average Annual Returns**  
December 31, 2024 (unaudited)

---

	<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
Net Asset Value (NAV)	9.86%	4.79%	6.18%	7.11%
Market Value	0.74%	3.72%	7.18%	7.81%

UBS AM may waive fees and/or reimburse expenses, without which performance would be lower. Returns represent past performance and do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the sale of Fund shares. Total investment return at NAV is based on the change in the NAV of Fund shares and assumes reinvestment of dividends, capital gains, and return of capital distributions, if any, at prices pursuant to the Fund's dividend reinvestment program. Total investment return at market value is based on the change in the market price at which the Fund's shares traded on the NYSE American during the period and assumes reinvestment of dividends, capital gains, and return of capital distributions, if any, at prices pursuant to the Fund's dividend reinvestment program. Because the Fund's shares trade in the stock market based on investor demand, the Fund may trade at a price higher or lower than its NAV. Therefore, returns are calculated based on NAV and share price. **Past performance is no guarantee of future results.** The current performance of the Fund may be lower or higher than the figures shown. The Fund's yield, return, NAV and market price will fluctuate. Performance information current to the most recent month end is available by calling 1-800-293-1232.

The annualized gross and net expense ratios are 2.96%.

**INVESTMENT ABBREVIATIONS**

1 mo. = 1 month

3 mo. = 3 month

6 mo. = 6 month

EURIBOR = Euro Interbank Offered Rate

LIBOR = London Interbank Offered Rate

NR = Not Rated

SARL = société à responsabilité limitée

SOFR = Secured Overnight Financing Rate

WR = Withdrawn Rating

† Credit ratings given by the S&P Global Ratings Division of S&P Global Inc. ("S&P") and Moody's Investors Service, Inc. ("Moody's") are unaudited.

(1) Security exempt from registration under Rule 144A of the Securities Act of 1933, as amended. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers. At December 31, 2024, these securities amounted to a value of \$176,973,872 or 108.8% of net assets.

(2) Security or portion thereof is out on loan (See Note 2-K).

(3) This security is denominated in Euro.

See Accompanying Notes to Financial Statements.

## Credit Suisse Asset Management Income Fund, Inc.

### Schedule of Investments (continued)

December 31, 2024

- (4) Not readily marketable security; security is valued at fair value as determined in good faith by UBS Asset Management (Americas) LLC as the Fund's valuation designee under the oversight of the Board of Directors (See Note 2-A).
- (5) This security is denominated in British Pound.
- (6) Variable rate obligation - The interest rate shown is the rate in effect as of December 31, 2024. The rate may be subject to a cap and floor.
- (7) PIK: Payment-in-kind security for which part of the income earned may be paid as additional principal.
- (8) Illiquid security.
- (9) The rates on certain variable rate securities are not based on a published reference rate and spread but are determined by the issuer or agent and are based on current market conditions. These securities do not indicate a reference rate and spread in their description above. The interest rate shown is the rate in effect as of December 31, 2024.
- (10) Bond is currently in default.
- (11) Non-income producing security.
- (12) Security is valued using significant unobservable inputs.
- (13) Security is held through holdings of 100 shares of the CIG Special Purpose SPC - Credit Suisse Asset Management Income Fund Segregated Portfolio, an affiliated entity.
- (14) Represents security purchased with cash collateral received for securities on loan.

Net assets, end of year (000s omitted)	\$162,720	\$156,155	\$143,914	\$179,614	\$178,641
Ratio of net expenses to average net assets	2.96%	3.10%	1.91%	1.07%	1.25%
Ratio of net expenses to average net assets excluding interest expense	0.97%	0.88%	0.89%	0.80%	0.75%
Ratio of net investment income to average net assets	8.28%	8.79%	7.79%	6.70%	8.55%
Asset Coverage per \$1,000 of Indebtedness	\$ 3,855	\$ 3,974	\$ 3,379	\$ 4,070	\$ 4,162
Outstanding senior securities (000s omitted)	\$ 57,000	\$ 52,500	\$ 60,500	\$ 58,500	\$ 56,500
Portfolio turnover rate <sup>3</sup>	60%	39%	42%	53%	36%

<sup>1</sup> Per share information is calculated using the average shares outstanding method.

<sup>2</sup> Total investment return at net asset value is based on changes in the net asset value of Fund shares and assumes reinvestment of distributions, if any, at actual prices pursuant to the Fund's dividend reinvestment program. Total investment return at market value is based on changes in the market price at which the Fund's shares traded on the stock exchange during the period and assumes reinvestment of distributions, if any, at actual prices pursuant to the Fund's dividend reinvestment program. Because the Fund's shares trade in the stock market based on investor demand, the Fund may trade at a price higher or lower than its NAV. Therefore, returns are calculated based on NAV and market price (See Note 6).

<sup>3</sup> Portfolio turnover is calculated by dividing the lesser of total purchases or sales of portfolio securities for the reporting period by the monthly average of portfolio securities owned during the reporting period. Excluded from both the numerator and denominator are amounts relating to derivatives and securities whose maturities or expiration dates at the time of acquisition were one year or less.

- <sup>1</sup> Per share information is calculated using the average shares outstanding method.
- <sup>2</sup> Total investment return at net asset value is based on the change in the net asset value of Fund shares and assumes reinvestment of distributions, if any, at actual prices pursuant to the Fund's dividend reinvestment program. Total investment return at market value is based on the change in the market price at which the Fund's shares traded on the stock exchange during the period and assumes reinvestment of distributions, if any, at actual prices pursuant to the Fund's dividend reinvestment program. Because the Fund's shares trade in the stock market based on investor demand, the Fund may trade at a price higher or lower than its NAV. Therefore, returns are calculated based on NAV and market price (See Note 6).
- <sup>3</sup> This amount represents less than \$(0.01) per share.
- <sup>4</sup> Portfolio turnover is calculated by dividing the lesser of total purchases or sales of portfolio securities for the reporting period by the monthly average of portfolio securities owned during the reporting period. Excluded from both the numerator and denominator are amounts relating to derivatives and securities whose maturities or expiration dates at the time of acquisition were one year or less.

## Note 1. Organization

Credit Suisse Asset Management Income Fund, Inc. (the “Fund”) was incorporated on February 11, 1987 and is registered as a diversified, closed-end management investment company under the Investment Company Act of 1940, as amended (the “1940 Act”). The investment objective of the Fund is to provide current income consistent with the preservation of capital.

UBS Asset Management (Americas) LLC (“UBS AM” or the “Adviser”), the investment adviser to the Fund, is registered as an investment adviser with the Securities and Exchange Commission (“SEC”) and as a Commodity Pool Operator with the Commodity Futures Trading Commission. UBS Asset Management (US) Inc. (“UBS AM (US)”) serves as the principal underwriter for the Fund. UBS AM and UBS AM (US) are indirect wholly owned subsidiaries of UBS Group AG. UBS Group AG is an internationally diversified organization with headquarters in Zurich, Switzerland. UBS Group AG operates in many areas of the financial services industry.

In this reporting period, the Fund adopted FASB Accounting Standards Update 2023-07, Segment Reporting (Topic 280) — Improvements to Reportable Segment Disclosures (“ASU 2023-07”). Adoption of the new standard impacted financial statement disclosures only and did not affect the Fund’s financial position or the results of its operations. An operating segment is defined in Topic 280 as a component of a public entity that engages in business activities from which it may recognize revenues and incur expenses, has operating results that are regularly reviewed by the public entity’s chief operating decision maker (CODM) to make decisions about resources to be allocated to the segment and assess its performance, and has discrete financial information available. The Fund’s portfolio management team acts as the Fund’s CODM. The Fund represents a single operating segment, as the CODM monitors the operating results of the Fund as a whole and the Fund’s long-term strategic asset allocation is predetermined in accordance with the Fund’s single investment objective which is executed by the Fund’s portfolio managers as a team. The financial information in the form of the Fund’s portfolio composition, total returns, expense ratios and changes in net assets (i.e., changes in net assets resulting from operations, subscriptions and redemptions) which are used by the CODM to assess the Fund’s comparative benchmarks and to make resource allocation decisions for the Fund’s single segment, is consistent with that presented within the Fund’s financial statements. Segment assets are reflected on the accompanying statement of assets and liabilities as “total assets” and significant segment expenses are listed on the accompanying statement of operations.

## Note 2. Significant Accounting Policies

The following is a summary of significant accounting policies followed by the Fund in the preparation of its financial statements. The policies are in accordance with generally accepted accounting principles in the United States of America (“GAAP”). The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates. The Fund is considered an investment company for financial reporting purposes under GAAP and follows the accounting and reporting guidance in Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic 946—Financial Services —Investment Companies.

A) SECURITY VALUATION — The Board of Directors (the “Board”) is responsible for the Fund’s valuation process. The Board has delegated the supervision of the daily valuation process to the Adviser, who has established a Pricing Committee and a Pricing Group, which, pursuant to the policies adopted by the Board, are responsible for making fair valuation determinations and overseeing the Fund’s pricing policies. The net asset value (“NAV”) of the Fund is determined daily as of the close of regular trading on the New York Stock Exchange, Inc. (the “Exchange”) on each day the Exchange is open for business. The valuations for fixed income securities (which may include, but are not limited

**Note 2. Significant Accounting Policies (continued)**

to, corporate, government, municipal, mortgage-backed, collateralized mortgage obligations and asset-backed securities) and certain derivative instruments are typically the prices supplied by independent third party pricing services, which may use market prices or broker/dealer quotations or a variety of valuation techniques and methodologies. The independent third party pricing services use inputs that are observable such as issuer details, interest rates, yield curves, prepayment speeds, credit risks/spreads, default rates and quoted prices for similar securities. These pricing services generally price fixed income securities assuming orderly transactions of an institutional “round lot” size, but some trades occur in smaller “odd lot” sizes which may be effected at lower prices than institutional round lot trades. Structured note agreements are valued in accordance with a dealer-supplied valuation based on changes in the value of the underlying index. Futures contracts are valued daily at the settlement price established by the board of trade or exchange on which they are traded. Forward contracts are valued at the London closing spot rates and the London closing forward point rates on a daily basis. The currency forward contract pricing model derives the differential in point rates to the expiration date of the forward and calculates its present value. Equity securities for which market quotations are available are valued at the last reported sales price or official closing price on the primary market or exchange on which they trade. Investments in open-ended mutual funds are valued at the NAV as reported on each business day and under normal circumstances. Securities for which market quotations are not readily available are valued at their fair value as determined in good faith by the Adviser, as the Board’s valuation designee (as defined in Rule 2a-5 under the 1940 Act), in accordance with the Adviser’s procedures. The Board oversees the Adviser in its role as valuation designee in accordance with the requirements of Rule 2a-5 under the 1940 Act. The Fund may utilize a service provided by an independent third party to fair value certain securities. When fair value pricing is employed, the prices of securities used by the Fund to calculate its NAV may differ from quoted or published prices for the same securities. If independent third party pricing services are unable to supply prices for a portfolio investment, or if the prices supplied are deemed by the Adviser to be unreliable, the market price may be determined by the Adviser using quotations from one or more brokers/dealers or at the transaction price if the security has recently been purchased and no value has yet been obtained from a pricing service or pricing broker. When reliable prices are not readily available, such as when the value of a security has been significantly affected by events after the close of the exchange or market on which the security is principally traded, but before the Fund calculates its NAV, these securities will be fair valued in good faith by the Pricing Group, in accordance with procedures established by the Adviser.

The Fund uses valuation techniques to measure fair value that are consistent with the market approach and/or income approach, depending on the type of security and the particular circumstance. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable securities. The income approach uses valuation techniques to discount estimated future cash flows to present value.

GAAP established a disclosure hierarchy that categorizes the inputs to valuation techniques used to value assets and liabilities at each measurement date. These inputs are summarized in the three broad levels listed below:

- Level 1 — quoted prices in active markets for identical investments
- Level 2 — other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 — significant unobservable inputs (including the Fund’s own assumptions in determining the fair value of investments)

The inputs or methodologies used to value securities are not necessarily an indication of the risk associated with investing in those securities.

**Credit Suisse Asset Management Income Fund, Inc.**  
**Notes to Financial Statements (continued)**  
December 31, 2024

**Note 2. Significant Accounting Policies (continued)**

The following is a summary of the inputs used as of December 31, 2024 in valuing the Fund's assets and liabilities carried at fair value:

<u>Assets</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Investments in Securities

**Quantitative Disclosure About Significant Unobservable Inputs**

<u>Asset Class</u>	<u>Fair Value At December 31, 2024</u>	<u>Valuation Technique</u>	<u>Unobservable Input</u>	<u>Price Range (Weighted Average)*</u>
Bank Loans	\$4,814,970	Vendor pricing	Single Broker Quote	\$0.65 - \$1.01 (\$0.93)
	125,152	Income Approach	Expected Remaining Distribution	0.00 - 0.78 (0.78)
Corporate Bonds	128,154	Recent Transactions	Trade Price	1.02 - 1.03 (1.03)
	74,056	Income Approach	Expected Remaining Distribution	0.62 - 0.63 (0.62)
Common Stocks	2,117	Income Approach	Expected Remaining Distribution	0.00 - 1.48 (0.84)
Warrant	0	Income Approach	Expected Remaining Distribution	0.00 (N/A)

\* Weighted by relative fair value

**Note 2. Significant Accounting Policies (continued)**

Each fair value determination is based on a consideration of relevant factors, including both observable and unobservable inputs. Observable and unobservable inputs that UBS AM considers may include (i) information obtained from the company, which may include an analysis of the company’s financial statements, the company’s products or intended markets or the company’s technologies; (ii) the price of the same or similar security negotiated at arm’s length in an issuer’s completed subsequent round of financing; (iii) the price and extent of public trading in similar securities of the issuer or of comparable companies; or (iv) a probability and time value adjusted analysis of contractual term. Where available and appropriate, multiple valuation methodologies are applied to confirm fair value. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, determining fair value requires more judgment. Because of the inherent uncertainty of valuation, those estimated values may be materially higher or lower than the values that would have been used had a ready market for the investments existed. Accordingly, the degree of judgment exercised by the Fund in determining fair value is greatest for investments categorized in Level 3. In some circumstances, the inputs used to measure fair value might be categorized within different levels of the fair value hierarchy. In those instances, the fair value measurement is categorized in its entirety in the fair value hierarchy based on the least observable input that is significant to the fair value measurement. Additionally, changes in the market environment and other events that may occur over the life of the investments may cause the gains or losses ultimately realized on these investments to be different from the valuations used at the date of these financial statements.

For the year ended December 31, 2024, \$1,378,446 was transferred from Level 2 to Level 3 due to a lack of a pricing source supported by observable inputs and \$1,473,975 was transferred from Level 3 to Level 2 as a result of the availability of a pricing source supported by observable inputs. All transfers, if any, are assumed to occur at the end of the reporting period.

B) DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES — The Fund adopted amendments to authoritative guidance on disclosures about derivative instruments and hedging activities which require that a fund disclose (a) how and why an entity uses derivative instruments, (b) how derivative instruments and hedging activities are accounted for and (c) how derivative instruments and related hedging activities affect a fund’s financial position, financial performance and cash flows.

The following table presents the fair value and the location of derivatives within the Statement of Assets and Liabilities at December 31, 2024 and the effect of these derivatives on the Statement of Operations for the year ended December 31, 2024.

<u>Primary Underlying Risk</u>	<u>Derivative Assets</u>	<u>Derivative Liabilities</u>	<u>Realized Gain (Loss)</u>	<u>Net Change in Unrealized Appreciation (Depreciation)</u>
Foreign currency exchange rate forward contracts	\$183,168	\$1,426	\$(90,763)	\$287,944

For the year ended December 31, 2024, the Fund held an average monthly value on a net basis of \$3,927,333 in forward foreign currency contracts.

The Fund is a party to International Swap and Derivatives Association, Inc. (“ISDA”) Master Agreements (“Master Agreements”) with certain counterparties that govern over-the-counter derivative (including total return, credit default and interest rate swaps) and foreign exchange contracts entered into by the Fund. The Master Agreements may contain provisions regarding, among other things, the parties’ general obligations, representations, agreements, collateral requirements, events of default and early termination. Termination events

**Credit Suisse Asset Management Income Fund, Inc.**

applicable to the Fund may occur upon a decline in the Fund's net assets below a specified threshold over a certain period of time.

The following table presents by counterparty the Fund's derivative assets, net of related collateral held by the Fund, at December 31, 2024:

<u>Counterparty</u>	<u>Gross Amount of Derivative Assets Presented in the Statement of Assets and Liabilities<sup>(a)</sup></u>	<u>Financial Instruments and Derivatives Available for Offset</u>	<u>Non-Cash Collateral Received</u>	<u>Cash Collateral Received</u>	<u>Net Amount of Derivative Assets</u>
Deutsche Bank AG	\$ 2,646	\$—	\$—	\$—	\$ 2,646
Morgan Stanley	180,522	—	—	—	180,522
	<u>\$183,168</u>	<u>\$—</u>	<u>\$—</u>	<u>\$—</u>	<u>\$183,168</u>

The following table presents by counterparty the Fund's derivative liabilities, net of related collateral pledged by the Fund, at December 31, 2024:

<u>Counterparty</u>	<u>Gross Amount of Derivative Liabilities Presented in the Statement of Assets and Liabilities<sup>(a)</sup></u>	<u>Financial Instruments and Derivatives Available for Offset</u>	<u>Non-Cash Collateral Pledged</u>	<u>Cash Collateral Pledged</u>	<u>Net Amount of Derivative Liabilities</u>
Barclays Bank PLC	\$1,426	\$—	\$—	\$—	\$1,426

<sup>(a)</sup> Forward foreign currency contracts are included.

C) FOREIGN CURRENCY TRANSACTIONS — The books and records of the Fund are maintained in U.S. dollars. Transactions denominated in foreign currencies are recorded at the current prevailing exchange rates. All assets and liabilities denominated in foreign currencies, including purchases and sales of investments, and income and expenses, are translated into U.S. dollar amounts on the date of those transactions.

Reported net realized gain (loss) from foreign currency transactions arises from sales of foreign currencies; currency gains or losses realized between the trade and settlement dates on securities transactions; and the difference between the amounts of dividends, interest, and foreign withholding taxes recorded on the Fund's books and the U.S. dollar equivalent of the amounts actually received or paid. Net change in unrealized gains and losses on translation of assets and liabilities denominated in foreign currencies arises from changes in the fair values of assets and liabilities, other than investments, at the end of the period, resulting from changes in exchange rates.

The Fund does not isolate that portion of the results of operations resulting from fluctuations in foreign exchange rates on investments from the fluctuations arising from changes in market prices of investments held. Such fluctuations are included with net realized and unrealized gain or loss from investments in the Statement of Operations.

D) SECURITY TRANSACTIONS AND INVESTMENT INCOME/EXPENSE — Security transactions are accounted for on a trade date basis. Interest income/expense is recorded on the accrual basis. The Fund amortizes premiums and accretes discounts using the effective interest method. Dividend income/expense is recorded on the ex-dividend date. The cost of investments sold is determined by use of the specific identification method for both financial reporting and income tax purposes. To the extent any issuer defaults or a credit event occurs that impacts the issuer, the Fund may halt any additional interest income accruals and consider the realizability of interest accrued up to the date of default or credit event.

**Note 2. Significant Accounting Policies (continued)**

E) **DIVIDENDS AND DISTRIBUTIONS TO SHAREHOLDERS** — The Fund declares and pays dividends on a monthly basis and records them on ex-dividend date. Distributions of net realized capital gains, if any, are declared and paid at least annually. However, to the extent that a net realized capital gain can be reduced by a capital loss carryforward, such gain will not be distributed. Dividends and distributions to shareholders of the Fund are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

The Fund's dividend policy is to distribute substantially all of its net investment income to its shareholders on a monthly basis. However, in order to provide shareholders with a more consistent yield to the current trading price of shares of common stock of the Fund, the Fund may at times pay out less than the entire amount of net investment income earned in any particular month and may at times in any month pay out such accumulated but undistributed income in addition to net investment income earned in that month. As a result, the dividends paid by the Fund for any particular month may be more or less than the amount of net investment income earned by the Fund during such month.

F) **FEDERAL AND OTHER TAXES** — No provision is made for federal taxes as it is the Fund's intention to continue to qualify as a regulated investment company ("RIC") under the Internal Revenue Code of 1986, as amended (the "Code"), and to make the requisite distributions to its shareholders, which will be sufficient to relieve it from federal income and excise taxes.

In order to qualify as a RIC under the Code, the Fund must meet certain requirements regarding the source of its income, the diversification of its assets and the distribution of its income. One of these requirements is that the Fund derive at least 90% of its gross income for each taxable year from dividends, interest, payments with respect to certain securities loans, gains from the sale or other disposition of stock, securities or foreign currencies, other income derived with respect to its business of investing in such stock, securities or currencies or net income derived from interests in certain publicly-traded partnerships ("Qualifying Income").

The Fund adopted the authoritative guidance for uncertainty in income taxes and recognizes a tax benefit or liability from an uncertain position only if it is more likely than not that the position is sustainable based solely on its technical merits and consideration of the relevant taxing authority's widely understood administrative practices and procedures. The Fund has reviewed its current tax positions and has determined that no provision for income tax is required in the Fund's financial statements. The Fund's federal and state income and federal excise tax returns for each of the tax years in the four year period ended December 31, 2024, for which the applicable statutes of limitations have not expired are subject to examination by the Internal Revenue Service and state departments of revenue.

G) **CASH** — The Fund's uninvested cash balance is held in an interest bearing variable rate demand deposit account at State Street Bank and Trust Company ("SSB"), the Fund's custodian.

H) **CASH FLOW INFORMATION** — Cash, as used in the Statement of Cash Flows, is the amount reported in the Statement of Assets and Liabilities, including domestic and foreign currencies. The Fund invests in securities and distributes dividends from net investment income and net realized gains, if any (which are either paid in cash or reinvested at the discretion of shareholders). These activities are reported in the Statement of Changes in Net Assets. Information on cash payments is presented in the Statement of Cash Flows. Accounting practices that do not affect reporting activities on a cash basis include unrealized gain or loss on investment securities and accretion or amortization income/expense recognized on investment securities.

**Note 2. Significant Accounting Policies** (continued)

I) FORWARD FOREIGN CURRENCY CONTRACTS — A forward foreign currency exchange contract (“forward currency contract”) is a commitment to purchase or sell a foreign currency at the settlement date at a negotiated rate. The Fund will enter into forward currency contracts primarily for hedging foreign currency risk. Forward currency contracts are valued at the prevailing forward exchange rate of the underlying currencies and unrealized gain/loss is recorded daily. On the settlement date of the forward currency contract, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value of the contract at the time it was closed. Certain risks may arise upon entering into forward currency contracts from the potential inability of counterparties to meet the terms of their contracts. The maximum counterparty credit risk to the Fund is measured by the unrealized gain on appreciated contracts. Additionally, when utilizing forward currency contracts to hedge, the Fund forgoes the opportunity to profit from favorable exchange rate movements during the term of the contract. The Fund’s open forward currency contracts at December 31, 2024 are disclosed in the Schedule of Investments.

J) UNFUNDED LOAN COMMITMENTS — The Fund enters into certain agreements, all or a portion of which may be unfunded. The Fund is obligated to fund these loan commitments at the borrowers’ discretion. Funded and unfunded portions of credit agreements are presented in the Schedule of Investments. As of December 31, 2024, the Fund had no unfunded loan commitments.

Unfunded loan commitments and funded portions of credit agreements are marked to market daily and any unrealized appreciation or depreciation is included in the Statement of Assets and Liabilities and the Statement of Operations.

K) SECURITIES LENDING — The initial collateral received by the Fund is required to have a value of at least 102% of the market value of domestic securities on loan (including any accrued interest thereon) and 105% of the market value of foreign securities on loan (including any accrued interest thereon). The collateral is maintained thereafter at a value equal to at least 102% of the current market value of the securities on loan. The market value of loaned securities is determined at the close of each business day of the Fund and any additional required collateral is delivered to the Fund, or excess collateral returned by the Fund, on the next business day. Cash collateral received by the Fund in connection with securities lending activity may be pooled together with cash collateral for other funds/portfolios advised by UBS AM and may be invested in a variety of investments, including funds advised by SSB or an affiliate, the Fund’s securities lending agent, or money market instruments. However, in the event of default or bankruptcy by the other party to the agreement, realization and/or retention of the collateral may be subject to legal proceedings. The remaining maturities of the securities lending transactions are considered overnight and continuous. Loans are subject to termination by the Fund or the borrower at any time.

SSB has been engaged by the Fund to act as the Fund’s securities lending agent. As of December 31, 2024, the Fund had outstanding loans of securities to certain approved brokers for which the Fund received collateral:

Market Value of  
Loaned Securities

\$13,798,709

Market Value of  
Cash Collateral

\$14,077,250

**Note 2. Significant Accounting Policies** (continued)

The following table presents financial instruments that are subject to enforceable netting arrangements as of December 31, 2024.

**Gross Amounts Not Offset in the Statement of Assets and Liabilities**

Gross Asset Amounts Presented in the Statement of Assets and Liabilities <sup>(a)</sup>	Collateral Received <sup>(b)</sup>	Net Amount
\$13,798,709	\$(13,798,709)	\$—

<sup>(a)</sup> Represents market value of loaned securities at year end.

<sup>(b)</sup> The actual collateral received is greater than the amount shown here due to collateral requirements of the security lending agreement.

The Fund’s securities lending arrangement provides that the Fund and SSB will share the net income earned from securities lending activities. Securities lending income is accrued as earned. For the year ended December 31, 2024, total earnings received in connection with securities lending arrangements was \$567,030, of which \$446,882 was rebated to borrowers (brokers). The Fund retained \$90,113 in income, and SSB, as lending agent, was paid \$30,035.

L) OTHER — Lower-rated debt securities (commonly known as “junk bonds”) possess speculative characteristics and are subject to greater market fluctuations and risk of lost income and principal than higher-rated debt securities for a variety of reasons. Also, during an economic downturn or substantial period of rising interest rates, highly leveraged issuers may experience financial stress which would adversely affect their ability to service their principal and interest payment obligations, to meet projected business goals and to obtain additional financing.

The United Kingdom’s Financial Conduct Authority (the “FCA”), which regulates LIBOR, has ceased publishing all LIBOR settings. In April 2023, however, the FCA announced that some USD LIBOR settings would continue to be published under a synthetic methodology until September 30, 2024 for certain legacy contracts. After September 30, 2024, the remaining synthetic LIBOR settings ceased to be published, and all LIBOR settings have permanently ceased. The Secured Overnight Financing Rate, or “SOFR,” is a broad measure of the cost of borrowing cash overnight collateralized by U.S. Treasury securities in the purchase agreement (“repo”) market and has been used increasingly on a voluntary basis in new instruments and transactions. On March 15, 2022, the Adjustable Interest Rate Act was signed into law, providing a statutory fallback mechanism to replace LIBOR with a benchmark rate that is selected by the Federal Reserve Board and based on SOFR for certain contracts that reference LIBOR without adequate fallback provisions. On December 16, 2022, the Federal Reserve Board adopted regulations implementing the Adjustable Interest Rate Act by identifying benchmark rates based on SOFR that replaced LIBOR in different categories of financial contracts after June 30, 2023. These regulations apply only to contracts governed by U.S. law, among other limitations. Neither the effect of the LIBOR transition process nor its ultimate success can yet be known. Not all existing LIBOR-based instruments may have alternative rate-setting provisions and there remains uncertainty regarding the willingness and ability of issuers to add alternative rate-setting provisions in certain existing instruments. Parties to contracts, securities or other instruments using LIBOR may disagree on transition rates or the application of applicable transition regulation, potentially resulting in uncertainty of performance and the possibility of litigation. The Fund may have instruments linked to other interbank offered rates that may also cease to be published in the future.

**Note 2. Significant Accounting Policies (continued)**

In the normal course of business, the Fund trades financial instruments and enters into financial transactions for which risk of potential loss exists due to changes in the market (market risk) or failure of the other party to a transaction to perform (credit risk). Similar to credit risk, the Fund may be exposed to counterparty risk, including with respect to securities lending, or the risk that an institution or other entity with which the Fund has unsettled or open transactions will default. The potential loss could exceed the value of the financial assets recorded in the financial statements. Financial assets, which potentially expose the Fund to credit risk, consist principally of cash due from counterparties and investments. The extent of the Fund’s exposure to credit and counterparty risks in respect to these financial assets approximates their carrying value as recorded in the Fund’s Statement of Assets and Liabilities.

In addition, periods of economic uncertainty and changes can be expected to result in increased volatility of market prices of lower-rated debt securities and the Fund’s NAV.

**Note 3. Transactions with Affiliates and Related Parties**

UBS AM serves as investment adviser for the Fund. For its investment advisory services, UBS AM is entitled to receive a fee from the Fund at a rate per annum, computed weekly and paid quarterly as follows: 0.50% of an average weekly base amount which, with respect to each quarter, is the average of the lower of (i) the stock price (market value) of the Fund’s outstanding shares and (ii) the Fund’s net assets, in each case determined as of the last trading day for each week during the relevant quarter. For the year ended December 31, 2024, investment advisory fees earned were \$796,836.

The Fund from time to time purchases or sells loan investments in the secondary market through UBS AM or its affiliates acting in the capacity as broker-dealer. UBS AM or its affiliates may have acted in some type of agent capacity to the initial loan offering prior to such loan trading in the secondary market.

**Note 4. Line of Credit**

The Fund has a line of credit subject to annual renewal provided by SSB primarily to leverage its investment portfolio (the “Agreement”). The Fund may borrow the lesser of: a) \$85,000,000; b) an amount that is no greater than 33 1/3% of the Fund’s total assets minus the sum of liabilities (other than aggregate indebtedness constituting leverage); and c) the Borrowing Base as defined in the Agreement. Under the terms of the Agreement, the Fund pays a commitment fee of 0.25% on the unused amount. In addition, the Fund pays interest on borrowings at a designated reference rate plus a spread. At December 31, 2024, the Fund had loans outstanding under the Agreement of \$57,000,000. Unless renewed, the Agreement will terminate on June 4, 2025. During the year ended December 31, 2024, the Fund had borrowings under the Agreement as follows:

<u>Average Daily Loan Balance</u>	<u>Weighted Average Interest Rate %</u>	<u>Maximum Daily Loan Outstanding</u>	<u>Interest Expense</u>	<u>Number of Days Outstanding</u>
\$51,386,612	6.061%	\$57,000,000	\$3,179,578	366

The use of leverage by the Fund creates an opportunity for increased net income and capital appreciation for the Fund, but, at the same time, creates special risks, and there can be no assurance that a leveraging strategy will be successful during any period in which it is employed. The Fund intends to utilize leverage to provide the shareholders with a potentially higher return. Leverage creates risks for shareholders including the likelihood of greater volatility of NAV and market price of the Fund’s shares and the risk that fluctuations in interest rates on borrowings and short-term debt may affect the return to shareholders. To the extent the income or capital

**Note 4. Line of Credit** (continued)

appreciation derived from securities purchased with funds received from leverage exceeds the cost of leverage, the Fund’s return will be greater than if leverage had not been used. Conversely, if the income or capital appreciation from the securities purchased with such funds is not sufficient to cover the cost of leverage, the return to the Fund will be less than if leverage had not been used, and therefore the amount available for distribution to shareholders as dividends and other distributions will be reduced. In the latter case, UBS AM in its best judgment nevertheless may determine to maintain the Fund’s leveraged position if it deems such action to be appropriate under the circumstances.

Certain types of borrowings by the Fund may result in the Fund being subject to covenants in credit agreements, including those relating to asset coverage and portfolio composition requirements. The securities held by the Fund are subject to a lien granted to the lender, to the extent of the borrowing outstanding and any additional expenses. The Fund’s lenders may establish guidelines for borrowing which may impose asset coverage or portfolio composition requirements that are more stringent than those imposed by the 1940 Act. There is no guarantee that the Fund’s borrowing arrangements or other arrangements for obtaining leverage will continue to be available, or if available, will be available on terms and conditions acceptable to the Fund. Expiration or termination of available financing for leveraged positions can result in adverse effects to the Fund’s access to liquidity and its ability to maintain leverage positions, and may cause the Fund to incur losses. Unfavorable economic conditions also could increase funding costs, limit access to the capital markets or result in a decision by lenders not to extend credit to the Fund. In addition, a decline in market value of the Fund’s assets may have particular adverse consequences in instances where the Fund has borrowed money based on the market value of those assets. A decrease in market value of those assets may result in the lender requiring the Fund to sell assets at a time when it may not be in the Fund’s best interest to do so.

**Note 5. Purchases and Sales of Securities**

For the year ended December 31, 2024, purchases and sales of investment securities and U.S. Government and Agency Obligations (excluding short-term investments) were as follows:

<u>Investment Securities</u>		<u>U.S. Government/ Agency Obligations</u>	
<u>Purchases</u>	<u>Sales</u>	<u>Purchases</u>	<u>Sales</u>
\$126,292,092	\$122,217,969	\$0	\$0

**Note 6. Fund Shares**

The Fund offers a Dividend Reinvestment Plan (the “Plan”) to its common stockholders. By participating in the Plan, dividends and distributions will be promptly paid to stockholders in additional shares of common stock of the Fund. The number of shares to be issued will be determined by dividing the total amount of the distribution payable by the greater of (i) the NAV of the Fund’s common stock on the payment date, or (ii) 95% of the market price per share of the Fund’s common stock on the payment date. If the NAV of the Fund’s common stock is greater than the market price (plus estimated brokerage commissions) on the payment date, Computershare Trust Company, N.A. (“Computershare”) (or a broker-dealer selected by Computershare) shall endeavor to apply the amount of such distribution to purchase shares of Fund common stock in the open market.

**Credit Suisse Asset Management Income Fund, Inc.**  
**Notes to Financial Statements (continued)**  
December 31, 2024

---

**Note 6. Fund Shares (continued)**

The Fund has one class of shares of common stock, par value \$0.001 per share; one hundred million shares are authorized. Transactions in shares of beneficial interest of the Fund were as follows:

	<u>For the Year Ended December 31, 2024</u>	<u>For the Year Ended December 31, 2023</u>
Shares issued through at-the-market offerings	1,966,284	122,441
Shares issued through reinvestment of dividends	55,585	28,627
Net increase	<u>2,021,869</u>	<u>151,068</u>

**Note 7. Shelf Offering**

The Fund has an effective “shelf” registration statement, which became effective with the SEC on November 17, 2021. The shelf registration statement enables the Fund to issue up to \$250,000,000 in proceeds through one or more public offerings. Shares may be offered at prices and terms to be set forth in one or more supplements to the Fund’s prospectus included in the shelf registration statement. On November 19, 2021, the Fund filed a prospectus supplement relating to an at-the-market offering of the Fund’s shares of common stock. Any proceeds raised through such offering will be used for investment purposes.

Costs incurred by the Fund in connection with its shelf registration statement and prospectus supplement are recorded as a prepaid expense and recognized as “Deferred offering costs” on the Statement of Assets and Liabilities. These costs will be amortized pro rata as common shares are sold and will be recognized as a component of proceeds from the shelf offering on the Statement of Changes in Net Assets. Any deferred offering costs remaining after the effectiveness of the shelf registration statement will be expensed. Costs incurred by the Fund to keep the shelf registration current are expensed as incurred and recognized as a component of “Miscellaneous expense” on the Statement of Operations. Deferred offering costs amortized during the year ended December 31, 2024 were \$23,968.

**Note 8. Income Tax Information and Distributions to Shareholders**

Income and capital gain distributions are determined in accordance with federal income tax regulations, which may differ from GAAP.

The tax character of dividends paid by the Fund during the fiscal years ended December 31, 2024 and 2023, respectively, was as follows:

<u>Ordinary Income</u>		<u>Return of Capital</u>	
<u>2024</u>	<u>2023</u>	<u>2024</u>	<u>2023</u>
\$13,249,216	\$12,989,932	\$1,267,716	\$1,224,299

The tax basis components of distributable earnings differ from book basis by temporary book/tax differences. These differences are primarily due to differing treatments of wash sales, forward contracts marked to market, and premium amortization accruals.

**Note 8. Income Tax Information and Distributions to Shareholders (continued)**

At December 31, 2024, the components of distributable earnings on a tax basis were as follows:

Accumulated net realized loss	\$(29,777,529)
Unrealized depreciation	<u>(5,363,984)</u>
	<u>\$(35,141,513)</u>

At December 31, 2024, the Fund had \$29,777,529 of unlimited long-term capital loss carryforwards available to offset possible future capital gains.

At December 31, 2024, the cost and net unrealized appreciation (depreciation) of investments and derivatives for income tax purposes were as follows:

Cost of Investments	\$234,512,708
Unrealized appreciation	\$ 3,823,711
Unrealized depreciation	<u>(9,187,139)</u>
Net unrealized appreciation (depreciation)	<u>\$ (5,363,428)</u>

To adjust for current period permanent book/tax differences which arose principally from differing book/tax treatment due to a prior year defaulted bonds true-up adjustment, paid in capital was charged \$85,208 and distributable earnings/loss was credited \$85,208. Net assets were not affected by this reclassification.

**Note 9. Contingencies**

In the normal course of business, the Fund may provide general indemnifications pursuant to certain contracts and organizational documents. The Fund's maximum exposure under these arrangements is dependent on future claims that may be made against the Fund and, therefore, cannot be estimated; however, based on experience, the risk of loss from such claims is considered remote.

**Note 10. Subsequent Events**

In preparing the financial statements as of December 31, 2024, management considered the impact of subsequent events for potential recognition or disclosure in these financial statements through the date of release of this report. No such events requiring recognition or disclosure were identified through the date of the release of this report.

**Credit Suisse Asset Management Income Fund, Inc.**  
**Report of Independent Registered Public Accounting Firm**

---

To the Shareholders and the Board of Directors of  
Credit Suisse Asset Management Income Fund, Inc.

*Opinion on the Financial Statements*

We have audited the accompanying statement of assets and liabilities of Credit Suisse Asset Management Income Fund, Inc. (the “Fund”), including the schedule of investments, as of December 31, 2024, and the related statements of operations, cash flows and changes in net assets, and the financial highlights for the year then ended and the related notes (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Fund at December 31, 2024, the results of its operations, its cash flows, the changes in its net assets and its financial highlights for the year then ended, in conformity with U.S. generally accepted accounting principles.

The statement of changes in net assets for the year ended December 31, 2023, and the financial highlights for each of the years in the four year period then ended, were audited by another independent registered public accounting firm whose report, dated February 26, 2024, expressed an unqualified opinion on that statement of changes in net assets and those financial highlights.

*Basis for Opinion*

These financial statements are the responsibility of the Fund’s management. Our responsibility is to express an opinion on the Fund’s financial statements based on our audit. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (“PCAOB”) and are required to be independent with respect to the Fund in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Fund is not required to have, nor were we engaged to perform, an audit of the Fund’s internal control over financial reporting. As part of our audit, we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Fund’s internal control over financial reporting. Accordingly, we express no such opinion.

Our audit included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 2024, by correspondence with the custodian, brokers and others; when replies were not received from brokers and others, we performed other auditing procedures. Our audit also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audit provides a reasonable basis for our opinion.

*Ernst + Young LLP*

We have served as the auditor of one or more UBS investment companies since 1978.

New York, New York

## **Credit Suisse Asset Management Income Fund, Inc. Board Approval of Advisory Agreement (unaudited)**

---

In approving the renewal of the current investment advisory agreement (the “Advisory Agreement”) for the Credit Suisse Asset Management Income Fund, Inc. (the “Fund”), the Board of Directors of the Fund (the “Board”), including all of the directors who are not “interested persons” of the Fund as defined in the Investment Company Act of 1940 (the “Independent Directors”), at a special Microsoft Teams meeting held on November 6, 2024 where the Board discussed information and materials previously provided to them in connection with the renewal of the Advisory Agreement, and at an in-person meeting held on November 11 and 12, 2024, considered the following factors:

### **Investment Advisory Fee Rates and Expenses**

The Board reviewed and considered the contractual investment advisory fee rate of 0.50% (the “Contractual Advisory Fee”) for the Fund in light of the extent and quality of the advisory services provided by UBS Asset Management (Americas) LLC (“UBS AM (Americas)”), the Fund’s investment adviser. The Board noted that UBS AM (Americas) had contractually agreed to base its current investment advisory fee on an average weekly base amount which, with respect to each quarter, is the average of the lesser of (i) the stock price (market value) of the Fund’s outstanding shares and (ii) the Fund’s net assets, in each case determined as of the last trading day for each week during that quarter. The Board also noted that the Fund does not pay UBS AM (Americas) an advisory fee on the Fund’s leveraged assets. The Board noted that effective May 1, 2024, Credit Suisse Asset Management, LLC (“Credit Suisse”), the Fund’s previous investment adviser, merged into UBS AM (Americas) LLC, with UBS AM (Americas) as the surviving entity, and UBS AM (Americas) became the investment adviser to the Fund under the Advisory Agreement.

Additionally, the Board received and considered information comparing the Fund’s Contractual Advisory Fee and overall expenses with those of funds in both the relevant expense group (“Expense Group”) and universe of funds (“Expense Universe”) provided by Broadridge Financial Solutions, Inc. (“Broadridge”), an independent provider of investment company data. The Board was provided with a description of the methodology used to arrive at the funds included in the Expense Group and the Expense Universe. Each fund in the Expense Group and Expense Universe was placed in one of five quintiles for each relevant comparison period, with the first quintile including the funds with the lowest relative expenses and the fifth quintile including funds with the highest relative expenses during the period. The Board noted that, with respect to the Fund’s fees and expenses compared to its peers as presented in a report provided by Broadridge, the Fund’s Contractual Advisory Fee ranked in the first quintile relative to its Expense Group, and the Fund’s actual advisory fees (including and excluding leveraged assets) and total expenses fees (including and excluding leveraged assets) ranked in the first quintile relative to its Expense Group and Expense Universe.

### **Nature, Extent and Quality of the Services under the Advisory Agreement**

The Board received and considered information regarding the nature, extent and quality of services provided to the Fund by UBS AM (Americas) under the Advisory Agreement. The Board also noted information received at regular meetings throughout the year related to the services rendered by UBS AM (Americas) which, in addition to the portfolio management and investment advisory services set forth in the Advisory Agreement, included credit analysis and research; supervising the day-to-day operations of the Fund’s non-advisory functions, which include accounting, administration, custody, transfer agent and other applicable third party service providers; overseeing and facilitating audits; overseeing the Fund’s credit facility; and supervising and/or preparing applicable Fund filings, disclosures and shareholder reports. The Board noted that the extensive investment advisory services provided by UBS AM (Americas) included broad supervisory responsibility and oversight over other service providers to the Fund. The Board also considered UBS AM (Americas)’s compliance program with

**Credit Suisse Asset Management Income Fund, Inc.**  
**Board Approval of Advisory Agreement (unaudited) (continued)**

---

respect to the Fund. The Board noted that UBS AM (Americas) reports to the Board about portfolio management and compliance matters on a periodic basis. The Board reviewed background information about UBS AM (Americas) including its Form ADV Part 2 – Disclosure Brochure and Brochure Supplement. The Board considered the background and experience of UBS AM (Americas)’s senior management and the expertise of, and the amount of attention given to the Fund by, senior personnel of UBS AM (Americas). In addition, the Board reviewed the qualifications, backgrounds and responsibilities of the portfolio management team primarily responsible for the day-to-day portfolio management of the Fund and the extent of the resources devoted to research and analysis of actual and potential investments, as well as the resources provided to them. The Board evaluated the ability of UBS AM (Americas), based on its resources, reputation and other attributes, to attract and retain qualified investment professionals, including research, advisory, and supervisory personnel. The Board also received and considered information about the nature, extent and quality of services and fee rates offered to other UBS AM (Americas) clients for comparable services. The Board acknowledged UBS AM (Americas)’s representation that the services provided to the Fund are more extensive than the services provided in connection with other types of accounts, such as separate accounts, offered by UBS AM (Americas) and the services are also more extensive from those offered and provided to a sub-advised fund. The Board also considered that the services provided by UBS AM (Americas) have expanded over time as a result of regulatory and other developments.

**Fund Performance**

The Board received and considered performance results of the Fund over the previous year ended August 31, 2024 as well as over the two-, three-, four-, five- and ten-year periods ended August 31, 2024, along with comparisons both to the relevant performance group (“Performance Group”) and universe of funds (“Performance Universe”) for the Fund for the same time periods provided in the Broadridge report. The Board was provided with a description of the methodology used to arrive at the funds included in the Performance Group and the Performance Universe. Each fund in the Performance Universe was placed in one of five quintiles for each relevant comparison period, with the first quintile including the best performing funds and the fifth quintile including the worst performing funds during the period. The Board noted that, with respect to the Fund’s performance compared to its peers as presented in the Broadridge report, the Fund’s performance ranked in the first quintile relative to its Performance Universe for the two-, three-, four-, five-, and ten-year periods reported, and the Fund’s performance ranked in the third quintile relative to its Performance Universe for the one-year period reported. The Board considered that the Fund has continued to trade relatively well, at a small premium to net asset value, based on Lipper data provided by UBS AM (Americas) reflecting the Fund’s historical share price and net asset value. The Board also considered the investment performance of the Fund relative to its stated objectives.

**Investment Adviser Profitability**

The Board received and considered a profitability analysis of Credit Suisse, as the investment adviser to the Fund prior to May 1, 2024, based on the fees payable under the Advisory Agreement for the Fund, as well as other relationships between the Fund on the one hand and Credit Suisse affiliates on the other. The Board deliberations also reflected, in the context of Credit Suisse’s profitability, Credit Suisse’s methodology for allocating costs to the Fund, recognizing that cost allocation methodologies are inherently subjective. The Board also received net profitability information for the other funds in the Credit Suisse family of funds, which include both open-end and closed-end funds. The Board also reviewed Credit Suisse’s profit margin as reflected in the profitability analysis, as well as reviewing profitability in light of appropriate court cases and the services

**Credit Suisse Asset Management Income Fund, Inc.**  
**Board Approval of Advisory Agreement (unaudited) (continued)**

---

rendered to the Fund. The Board noted that UBS AM (Americas)'s profitability with respect to the Credit Suisse family of funds was expected to be in line with that of Credit Suisse.

**Economies of Scale**

The Board considered information regarding whether there have been economies of scale with respect to the management of the Fund, whether the Fund has appropriately benefited from any economies of scale, and whether there is potential for realization of any further economies of scale for the Fund. The Board considered that, if the Fund's asset levels grow, further economies of scale potentially could be realized (although this is not guaranteed). The Board noted the current advisory fee structure and the fact that the Fund does not pay advisory fees on the Fund's leveraged assets. Additionally, the Board noted the Fund has an effective shelf registration statement that permits it to conduct an at-the-market offering, whereby the Fund may issue additional shares when the Fund's shares are trading at a premium to its net asset value, and that between November 17, 2021 and September 30, 2024, the Fund sold and issued approximately 2,366,214 new shares for a net increase in assets of approximately \$7,247,852. The Board received information regarding UBS AM (Americas)'s profitability in connection with providing advisory services to the Fund, including UBS AM (Americas)'s costs in providing the services.

**Other Benefits to UBS AM (Americas)**

The Board considered other benefits received by UBS AM (Americas) and its affiliates as a result of their relationship with the Fund. Such benefits include, among others, benefits potentially derived from an increase in UBS AM (Americas)'s businesses and its reputation as a result of its relationship with the Fund (such as the ability to market its advisory services to other clients and investors including separate account or third party sub-advised mandates or other financial products offered by UBS AM (Americas) and its affiliates).

The Board considered the standards UBS AM (Americas) applied in seeking best execution and UBS AM (Americas)'s policies and practices regarding soft dollars and reviewed UBS AM (Americas)'s method for allocating portfolio investment opportunities among its advisory clients.

**Other Factors and Broader Review**

As discussed above, the Board reviewed detailed materials received from UBS AM (Americas) as part of the annual approval process. The Board also reviews and assesses the quality of the services that the Fund receives throughout the year and reviews reports of UBS AM (Americas) at least quarterly, which include, among other things, detailed portfolio and market reviews, detailed fund performance reports, and UBS AM (Americas)'s compliance procedures.

**Conclusions**

In selecting UBS AM (Americas), and approving the renewal of the Advisory Agreement and the investment advisory fee under such agreement, the Board concluded that:

- The Contractual Advisory Fee, reviewed along with information provided by Broadridge for the funds in the Fund's Expense Group and Expense Universe, was reasonable in relation to the services provided by UBS AM (Americas).
- The Board was satisfied with the nature, extent and quality of the investment advisory services provided to the Fund by UBS AM (Americas) and that, based on dialogue with management and counsel, the services provided by UBS AM (Americas) under the Advisory Agreement are typical of, and consistent with, those provided to similar mutual funds by other investment advisers.

**Credit Suisse Asset Management Income Fund, Inc.**  
**Board Approval of Advisory Agreement (unaudited) (continued)**

---

- In light of the costs of providing investment advisory and other services to the Fund and UBS AM (Americas)'s ongoing commitment to the Fund and willingness to base the fee on an average weekly base amount which, with respect to each quarter, is the average of the lesser of (i) the stock price (market value) of the Fund's outstanding shares and (ii) the Fund's net assets, in each case determined as of the last trading day for each week during that quarter, UBS AM (Americas)'s net profitability based on fees payable under the Advisory Agreement, as well as other ancillary benefits that UBS AM (Americas) and its affiliates received, were considered reasonable.
- In light of the information received and considered by the Board, the Fund's current fee structure was considered reasonable.

No single factor reviewed by the Board was identified by the Board as the principal factor in determining whether to approve the renewal of the Advisory Agreement. The Independent Directors were advised by separate independent legal counsel throughout the process.

## **Recent Changes**

*The following information is a summary of certain changes since that occurred since the close of the period covered by the previously transmitted annual shareholder report. This information may not reflect all of the changes that have occurred since you purchased the Fund.*

During the Fund's most recent fiscal year, there were no material changes in the Fund's investment objective or policies that have not been approved by shareholders or in the principal risk factors associated with investment in the Fund.

## **Investment Objective and Policies**

The investment objective of the Fund is to provide current income consistent with the preservation of capital. The Fund's investment portfolio will not be managed for capital appreciation. The Fund's investment objective is a fundamental policy and cannot be changed without the approval of the holders of a majority of the Fund's outstanding voting securities. As used herein, a "majority of the Fund's outstanding voting securities" means the lesser of (a) 67% of the shares represented at a meeting at which more than 50% of the outstanding shares are represented or (b) more than 50% of the outstanding shares. The Fund is not intended to be a complete investment program and there can be no assurance that the Fund will achieve its objectives.

Under normal circumstances, the Fund invests at least 75% of its total assets in fixed income securities, such as bonds, convertible securities and preferred stocks. The Fund's investments in fixed income securities are not subject to any rating quality limitation. The Fund primarily invests in high yield fixed income securities that are in the lower rating categories of Moody's Investors Service, Inc. ("Moody's"), S&P Global Ratings ("S&P"), a division of S&P Global Inc., or another nationally recognized ratings service (commonly referred to as "junk bonds"). Lower-rated securities generally provide yields superior to those of more highly-rated securities, but involve greater risks and are speculative in nature. See "Risk Factors — Lower-Rated Securities." The Fund may also invest in securities rated single A or higher by Moody's or S&P and unrated corporate fixed income securities.

Differing yields on fixed income securities of the same maturity are a function of several factors. Higher yields are generally available from securities in the lower rating categories of recognized rating agencies, i.e., Baa or lower by Moody's or BBB or lower by S&P. Securities ratings are based largely on the issuer's historical financial information and the rating agencies' investment analysis at the time of rating. Consequently, the rating assigned to any particular security is not necessarily a reflection of the issuer's current financial condition, which may be better or worse than the rating would indicate. Although UBS AM considers security ratings when making investment decisions for high yield securities, it performs its own investment analysis and does not rely principally on the ratings assigned by the rating services. UBS AM's analysis may include consideration of the issuer's experience and managerial strength, changing financial condition, borrowing requirements or debt maturity schedules, and its responsiveness to changes in business conditions and interest rates. It also considers relative values based on anticipated cash flow, interest or dividend coverage, asset coverage and earnings prospects.

UBS AM bases its investment decisions in high yield securities on the results of issuer and security-specific credit analysis. UBS AM evaluates each issuer's rating, cash flow, financial structure and business risk. UBS AM takes into account, among other things, the issuer's financial resources, its sensitivity to economic conditions and trends, its operating history, the quality of the issuer's management and regulatory matters. UBS AM evaluates the covenants of each security and pursues a strategy of broad issuer and industry diversification.

**Credit Suisse Asset Management Income Fund, Inc.**  
**Fund Summary (unaudited) (continued)**  
December 31, 2024

---

The Fund currently utilizes and in the future expects to continue to utilize leverage through borrowings, including the issuance of debt securities, or through other transactions, such as reverse repurchase agreements, which have the effect of leverage. The Fund currently is leveraged through borrowings from a credit facility with SSB. The Fund may use leverage up to 33 1/3% of its total assets (including the amount obtained through leverage). There can be no guarantee that the Fund will be able to accurately predict when the use of leverage will be beneficial. Use of leverage creates an opportunity for increased income and capital appreciation for shareholders but, at the same time, creates special risks, and there can be no assurance that a leveraging strategy will be successful during any period in which it is employed.

The Fund may also invest in debt securities issued or guaranteed by the U.S. government, or by agencies or instrumentalities established or sponsored by the U.S. government, including mortgage-backed securities. Depending on market conditions, the Fund may invest a substantial portion of its assets in mortgage-backed securities. Mortgage-backed securities are collateralized by mortgages or interests in mortgages and may be issued by government or non-government entities. Mortgage-backed securities issued by government entities typically provide a monthly payment consisting of interest and principal payments, and additional payments will be made out of unscheduled payments of principal. Non-government issued mortgage-backed securities may offer higher yields than those issued by government entities, but may be subject to greater price fluctuations. To the extent that the Fund invests in the mortgage market, UBS AM will evaluate relevant economic, environmental and security-specific variables such as housing starts, coupon and age trends.

The Fund may invest in loans and loan participations (collectively, "Loans"), including senior secured floating Loans ("Senior Loans"), "second lien" secured floating rate Loans ("Second Lien Loans"), and other types of secured Loans with fixed and variable interest rates.

UBS AM may take full advantage of the entire range of maturities of fixed income securities and may adjust the average maturity of the investments held in the Fund's portfolio from time to time, depending on its assessment of relative yields of securities of different maturities and its expectations of future changes in interest rates. It is expected that the average weighted maturity of the Fund's investment portfolio will be 4 to 10 years.

The Fund invests in debt obligations and other fixed income securities denominated in U.S. dollars, non-U.S. currencies or composite currencies, including:

- debt obligations issued or guaranteed by foreign national, provincial, state, municipal or other governments with taxing authority or by their agencies or instrumentalities;
- debt obligations of supranational entities;
- debt obligations of the U.S. government issued in non-dollar denominated securities; and
- dollar and non-dollar denominated debt obligations and other fixed income securities of foreign and U.S. corporate issuers.

The Fund may invest a portion of its assets in the securities of issuers located in emerging markets. The Fund has a fundamental policy not to invest more than 5% of the value of its total assets in securities denominated in a currency other than the U.S. dollar.

In making investments in foreign and emerging market securities, UBS AM considers the relative growth and inflation rates of different countries. UBS AM considers expected changes in foreign currency exchange rates, including the prospects for central bank intervention, in determining the anticipated returns of securities

denominated in foreign currencies. UBS AM further evaluates, among other things, foreign yield curves and regulatory and political factors, including the fiscal and monetary policies of such countries.

In the past, during periods of falling U.S. exchange rates, yields available from securities denominated in foreign currencies have often been higher, in U.S. dollar terms, than those of securities denominated in U.S. dollars. UBS AM considers expected changes in foreign currency exchange rates in determining the anticipated returns of securities denominated in foreign currencies. The obligations of foreign governmental entities, including supranational issuers, have various kinds of government support. Obligations of foreign governmental entities include obligations issued or guaranteed by national, provincial, state or other governments with taxing power or by their agencies. These obligations may or may not be supported by the full faith and credit of a foreign government.

The Fund may invest in credit default swap agreements. The Fund may enter into credit default swap agreements either as a buyer or a seller. The Fund may buy a credit default swap to attempt to mitigate the risk of default or credit quality deterioration in one or more individual holdings or in a segment of the fixed income securities market. The Fund may sell a credit default swap in an attempt to gain exposure to an underlying issuer's credit quality characteristics without investing directly in that issuer. The "buyer" in a credit default swap is obligated to pay the "seller" an upfront payment or a periodic stream of payments over the term of the agreement, provided that no credit event on an underlying reference obligation has occurred. If a credit event occurs, the seller must pay the buyer the full notional value, or "par value," of the reference obligation in exchange for the reference obligation. As a result of counterparty risk, certain credit default swap agreements may involve greater risks than if the Fund had invested in the reference obligation directly. There is no limit on the Fund's ability to enter into credit default swap agreements.

### **Risk Factors**

This section contains a discussion of the general risks of investing in the Fund. The net asset value and market price of, and dividends paid on, the Fund's common shares of beneficial interest (the "Shares") will fluctuate with and be affected by, among other things, the risks more fully described below. As with any fund, there can be no guarantee that the Fund will meet its investment objective or that the Fund's performance will be positive for any period of time.

*Investment and Market Risk.* An investment in the Shares is subject to investment risk, including the possible loss of the entire principal amount that you invest. Your investment in Shares represents an indirect investment in the securities owned by the Fund.

The value of these securities, like other market investments, may move up or down, sometimes rapidly and unpredictably, and these fluctuations are likely to have a greater impact on the value of the Shares during periods in which the Fund utilizes a leveraged capital structure. The value of the securities in which the Fund invests will affect the value of the Shares. Your Shares at any point in time may be worth less than your original investment, even after taking into account the reinvestment of Fund dividends and distributions.

*Lower-Rated Securities Risk.* At any time, all or substantially all of the Fund's portfolio may be invested in medium-grade or below investment grade fixed income securities (commonly referred to as "junk bonds") as determined by a nationally recognized rating service and in unrated securities of comparable quality. Lower-rated securities are regarded as being predominantly speculative as to the issuer's ability to make payments of principal and interest. Investment in such securities involves substantial risk. Issuers of lower-rated securities may be highly leveraged and may not have available to them more traditional methods of financing. Therefore,

the risks associated with acquiring the securities of such issuers generally are greater than is the case with higher-rated securities. For example, during an economic downturn or a sustained period of rising interest rates, issuers of lower-rated securities may be more likely to experience financial stress, especially if such issuers are highly leveraged. During periods of economic downturn, such issuers may not have sufficient revenues to meet their interest payment obligations. The issuer's ability to service its debt obligations also may be adversely affected by specific issuer developments, the issuer's inability to meet specific projected business forecasts or the unavailability of additional financing. The risk of loss due to default by the issuer is significantly greater for the holders of lower-rated securities because such securities may be unsecured and may be subordinate to other creditors of the issuer.

*Credit Risk.* Credit risk is the risk that one or more of the Fund's investments in debt securities or other instruments will decline in price, or fail to pay interest, liquidation value or principal when due, because the issuer of the obligation or the issuer of a reference security experiences an actual or perceived decline in its financial status. In addition to the credit risks associated with high yield securities, the Fund could also lose money if the issuer of other debt obligations, or the counterparty to a derivatives contract, repurchase agreement, loan of portfolio securities or other obligation, is, or is perceived to be, unable or unwilling to make timely principal and/or interest payments, or to otherwise honor its obligations. The downgrade of a security may further decrease its value.

*Interest Rate Risk.* Generally, when market interest rates rise, the prices of debt obligations fall, and vice versa. Interest rate risk is the risk that debt obligations and other instruments in the Fund's portfolio will decline in value because of increases in market interest rates. The Fund may be subject to a greater risk of rising interest rates due to the recent period of historically low rates. The prices of long-term debt obligations generally fluctuate more than prices of short-term debt obligations as interest rates change. During periods of rising interest rates, the average life of certain types of securities may be extended due to slower than expected payments. This may lock in a below market yield, increase the security's duration and reduce the security's value. The Fund's use of leverage will tend to increase interest rate risk.

Investments in floating rate debt instruments, although generally less sensitive to interest rate changes than longer duration fixed rate instruments, may nevertheless decline in value in response to rising interest rates if, for example, the rates at which they pay interest do not rise as much, or as quickly, as market interest rates in general. Conversely, floating rate instruments will not generally increase in value if interest rates decline. Inverse floating rate debt securities also may exhibit greater price volatility than a fixed rate debt obligation with similar credit quality. To the extent the Fund holds floating rate instruments, a decrease (or, in the case of inverse floating rate securities, an increase) in market interest rates will adversely affect the income received from such securities and the net asset value of the Fund's common shares.

*Leverage Risk.* The Fund currently leverages through borrowings from a credit facility. The use of leverage, which can be described as exposure to changes in price at a ratio greater than the amount of equity invested, through borrowings or other forms of market exposure, magnifies both the favorable and unfavorable effects of price movements in the investments made by the Fund. Insofar as the Fund continues to employ leverage in its investment operations, the Fund will be subject to greater risk of loss than if it had not employed leverage.

Therefore, if the market value of the Fund's investment portfolio declines, any leverage will result in a greater decrease in net asset value to common shareholders than if the Fund were not leveraged. Such greater net asset value decrease will also tend to cause a greater decline in the market price for the common shares.

## Credit Suisse Asset Management Income Fund, Inc.

### Fund Summary (unaudited) (continued)

December 31, 2024

---

The use of leverage may cause the Fund to liquidate portfolio positions when it may not be advantageous to do so to satisfy its obligations or to meet the applicable requirements of the 1940 Act and the rules thereunder. Further, if at any time while the Fund has leverage outstanding it does not meet applicable asset coverage requirements, it may be required to suspend distributions to common shareholders until the requisite asset coverage is restored. Any such suspension might impair the ability of the Fund to meet the regulated investment company distribution requirements and to avoid Fund-level U.S. federal income and/or excise taxes.

Under Rule 18f-4 under the 1940 Act, among other things, the Fund must either use derivatives in a limited manner or comply with an outer limit on fund leverage risk based on value-at-risk.

*Corporate Debt Risk.* The Fund may invest in debt securities of non-governmental issuers. Like all debt securities, corporate debt securities generally represent an issuer's obligation to repay to the investor (or lender) the amount borrowed plus interest over a specified time period. A typical corporate bond specifies a fixed date when the amount borrowed (principal) is due in full, known as the maturity date, and specifies dates when periodic interest (coupon) payments will be made over the life of the security.

Prices of corporate debt securities fluctuate and, in particular, are subject to several key risks including, but not limited to, interest rate risk, credit risk and prepayment risk. The market value of a corporate bond may be affected by the credit rating of the corporation, the corporation's performance and perceptions of the corporation in the market place. There is a risk that the issuers of the corporate debt securities in which the Fund may invest may not be able to meet their obligations on interest or principal payments at the time called for by an instrument.

*Foreign Securities Risk.* Investing in securities of foreign entities and securities denominated in foreign currencies involves certain risks not involved in domestic investments, including, but not limited to, fluctuations in foreign exchange rates, future foreign political and economic developments, different legal and accounting systems and the possible imposition of exchange controls or other foreign governmental laws or restrictions. Securities prices in different countries are subject to different economic, financial, political and social factors. Since the Fund may invest in securities denominated or quoted in currencies other than the U.S. dollar, changes in foreign currency exchange rates may affect the value of securities in the Fund and the unrealized appreciation or depreciation of investments. Currencies of certain countries may be volatile and therefore may affect the value of securities denominated in such currencies. The Fund may, but is not obligated to, engage in certain transactions to hedge the currency-related risks of investing in non-U.S. dollar denominated securities. In addition, with respect to certain foreign countries, there is the possibility of expropriation of assets, confiscatory taxation, difficulty in obtaining or enforcing a court judgment, economic, political or social instability or diplomatic developments that could affect investments in those countries. Moreover, individual foreign economies may differ favorably or unfavorably from the U.S. economy in such respects as growth of gross domestic product, rates of inflation, capital reinvestment, resources, self-sufficiency and balance of payments position. Certain foreign investments also may be subject to foreign withholding taxes. These risks often are heightened for investments in smaller, emerging capital markets.

*Emerging Market Securities Risk.* Investing in the securities of issuers located in emerging markets involves special considerations not typically associated with investing in the securities of U.S. issuers and other developed market issuers, including heightened risks of expropriation and/or nationalization, armed conflict, confiscatory taxation, restrictions on transfers of assets and market illiquidity, lack of uniform accounting and auditing standards, differences in regulatory and financial recordkeeping standards, difficulties in dividend withholding reclaims procedures, less publicly available financial and other information and potential difficulties in enforcing contractual obligations.

**Credit Suisse Asset Management Income Fund, Inc.**  
**Fund Summary (unaudited) (continued)**  
December 31, 2024

---

The economies of individual emerging market countries may differ favorably or unfavorably from the U.S. economy in such respects as growth of gross domestic product, rate of inflation, currency depreciation, capital reinvestment, resource self-sufficiency and balance of payments position. Governments of many developing and emerging market countries have exercised and continue to exercise substantial influence over many aspects of the private sector. In some cases, the government owns or controls many companies, including some of the largest in the country.

Accordingly, government actions could have a significant effect on economic conditions in an emerging market country and on market conditions, prices and yields of securities in the Fund's portfolio. Moreover, the economies of emerging market countries generally are heavily dependent upon international trade and, accordingly, have been and may continue to be adversely affected by trade barriers, exchange controls, managed adjustments in relative currency values and other protectionist measures imposed or negotiated by the countries with which they trade.

*Illiquid Securities Risk.* The Fund may invest in securities for which no readily available market exists or are otherwise considered illiquid. The Fund may not be able readily to dispose of such securities at prices that approximate those at which the Fund could sell such securities if they were more widely traded and, as result of such illiquidity, the Fund may have to sell other investments or engage in borrowing transactions if necessary to raise cash to meet its obligations. Liquid investments may become illiquid after purchase by the Fund, particularly during periods of market turmoil. There can be no assurance that a security or instrument that is deemed to be liquid when purchased will continue to be liquid for as long as it is held by the Fund. Regulatory changes have led to reduced liquidity in the marketplace, and the capacity of dealers to make markets in fixed income securities has been outpaced by the growth in the size of the fixed income markets. Liquidity risk may be magnified in a rising interest rate environment or when investor redemptions from fixed income funds may be higher than normal, due to the increased supply in the market that would result from selling activity. Illiquid securities generally trade at a discount.

*Prepayment Risk.* If interest rates fall, the principal on bonds and loans held by the Fund may be paid earlier than expected. If this happens, the proceeds from a prepaid security may be reinvested by the Fund in securities bearing lower interest rates, resulting in a possible decline in the Fund's income and distributions to shareholders.

*Preferred Stock Risk.* Preferred stocks are unique securities that combine some of the characteristics of both common stocks and bonds. Preferred stocks generally pay a fixed rate of return and are sold on the basis of current yield, like bonds. However, because they are equity securities, preferred stocks provide equity ownership of a company, and the income is paid in the form of dividends. Preferred stocks typically have a yield advantage over common stocks as well as comparably-rated fixed income investments. Preferred stocks are typically subordinated to bonds and other debt instruments in a company's capital structure, in terms of priority to corporate income, and therefore will be subject to greater credit risk than those debt instruments. Unlike interest payments on debt securities, preferred stock dividends are payable only if declared by the issuer's board of directors. Preferred stock also may be subject to optional or mandatory redemption provisions.

*Mortgage-Backed Securities Risk.* The Fund may invest a substantial portion of its total assets in mortgage-backed securities. The value of mortgage-backed securities is subject to change due to shifts in the market's perception of issuers, and regulatory or tax changes may adversely affect the mortgage securities market as a whole. Foreclosures and prepayments, which occur when unscheduled or early payments are made on the underlying mortgages, may shorten the effective maturities on these securities. The Fund's yield may be affected by reinvestment of prepayments at higher or lower rates than the original investment. Prepayments tend to increase

due to refinancing of mortgages as interest rates decline. In addition, like other debt securities, the values of mortgage-backed securities will generally fluctuate in response to changes in interest rates

*Senior Loans Risk.* The Fund's investments in Senior Loans are expected to typically be below investment grade. These investments are considered speculative because of the credit risk of their issuers. Such companies are more likely to default on their payments of interest and principal owed to the Fund, and such defaults could reduce the Fund's net asset value and income distributions. An economic downturn generally leads to a higher non-payment rate, and a debt obligation may lose significant value before a default occurs. Moreover, any specific collateral used to secure a loan may decline in value or become illiquid, which would adversely affect the loan's value.

Like other debt instruments, Senior Loans are subject to the risk of non-payment of scheduled interest or principal. Such non-payment would result in a reduction of income to the Fund, a reduction in the value of the investment and a potential decrease in the net asset value per share of the Fund. There can be no assurance that the liquidation of any collateral securing a loan would satisfy the borrower's obligation in the event of non-payment of scheduled interest or principal payments, or that such collateral could be readily liquidated. This is particularly the case where a senior loan is not backed by collateral or sufficient collateral at the time such senior loan is issued. In the event of bankruptcy of a borrower, the Fund could experience delays or limitations with respect to its ability to realize the benefits of the collateral securing a senior loan. The collateral securing a senior loan may lose all or substantially all of its value in the event of bankruptcy of a borrower. Some Senior Loans are subject to the risk that a court, pursuant to fraudulent conveyance or other similar laws, could subordinate such Senior Loans to presently existing or future indebtedness of the borrower or take other action detrimental to the holders of Senior Loans including, in certain circumstances, invalidating such Senior Loans or causing interest previously paid to be refunded to the borrower. If interest were required to be refunded, it could negatively affect the Fund's performance.

Transactions in Senior Loans may settle on a delayed basis, resulting in the proceeds from the sale of Senior Loans not being readily available to make additional investments or to meet the Fund's redemption obligations. To the extent the extended settlement process gives rise to short-term liquidity needs, the Fund may hold cash, sell investments or temporarily borrow from banks or other lenders.

*Second Lien and Other Secured Loans Risk.* Second Lien Loans and other secured Loans are subject to the same risks associated with investment in Senior Loans and bonds rated below investment grade. However, because Second Lien Loans are second in right of payment to one or more Senior Loans of the related borrower, and other secured Loans rank lower in right of payment to Second Lien Loans, they are subject to the additional risk that the cash flow of the borrower and any property securing the Loan may be insufficient to meet scheduled payments after giving effect to the more senior secured obligations of the borrower. This risk is generally higher for subordinated unsecured loans or debt, which are not backed by a security interest in any specific collateral. Second Lien Loans and other secured Loans are also expected to have greater price volatility than Senior Loans and may be less liquid. There is also a possibility that originators will not be able to sell participations in Second Lien Loans and other secured Loans, which would create greater credit risk exposure.

*Conflict of Interest Risk.* Affiliates of UBS AM may act as underwriter, lead agent or administrative agent for loans and participate in the secondary market for loans. Because of limitations imposed by applicable law, the presence of Credit Suisse's affiliates in the primary and secondary markets for loans may restrict the fund's ability to acquire some loans or affect the timing or price of such acquisitions.

*Derivatives Risk.* The Fund may invest in derivatives, such as credit default swap agreements and interest rate futures and related options. The primary risk of derivatives is the same as the risk of the underlying asset, namely that the value of the underlying asset may increase or decrease. Adverse movements in the value of the underlying asset can expose the Fund to losses. In addition, risks in the use of derivatives include:

- an imperfect correlation between the price of derivatives and the movement of the securities prices, interest rates or currency exchange rates being hedged or replicated;
- the possible absence of a liquid secondary market for any particular derivative at any time;
- the potential loss if the counterparty to the transaction does not perform as promised;
- the possible need to defer closing out certain positions to avoid adverse tax consequences, as well as the possibility that derivative transactions may result in acceleration of gain, deferral of losses or a change in the character of gain realized;
- the risk that the financial intermediary “manufacturing” the over-the-counter derivative, being the most active market maker and offering the best price for repurchase, will not continue to create a credible market in the derivative;
- because certain derivatives are “manufactured” by financial institutions, the risk that the Fund may develop a substantial exposure to financial institution counterparties; and
- the risk that a full and complete appreciation of the complexity of derivatives and how future value is affected by various factors including changing interest rates, exchange rates and credit quality is not attained.

There is no guarantee that derivatives will provide successful results and any success in their use depends on a variety of factors including the ability of UBS AM to predict correctly the direction of interest rates, securities prices, currency exchange rates and other factors.

*Credit Default Swap Risk.* Credit default swap contracts, a type of derivative instrument, involve special risks and may result in losses to the Fund. Credit default swaps may in some cases be illiquid, and they increase credit risk since the Fund has exposure to both the issuer of the referenced obligation and the counterparty to the credit default swap. Swaps may be difficult to unwind or terminate. The swap market could be disrupted or limited as a result of recent legislation, and these changes could adversely affect the Fund.

*Counterparty Risk.* The Fund will be subject to credit risk with respect to the counterparties to the derivative contracts purchased or sold by the Fund. Recently, several broker-dealers and other financial institutions have experienced extreme financial difficulty, sometimes resulting in bankruptcy of the institution. Although the Investment Adviser monitors the creditworthiness of the Fund’s counterparties, there can be no assurance that the Fund’s counterparties will not experience similar difficulties, possibly resulting in losses to the Fund. If a counterparty becomes bankrupt, or otherwise fails to perform its obligations under a derivative contract due to financial difficulties, the Fund may experience significant delays in obtaining any recovery under the derivative contract in a bankruptcy or other reorganization proceeding. The Fund may obtain only a limited recovery or may obtain no recovery in such circumstances.

*Valuation Risk.* Unlike publicly traded common stock which trades on national exchanges, there is no central place or exchange for bond trading. Bonds generally trade on an “over-the-counter” market which may be anywhere in the world where buyer and seller can settle on a price. Due to the lack of centralized information and

trading, the valuation of bonds may carry more risk than that of common stock. Uncertainties in the conditions of the financial market, unreliable reference data, lack of transparency and inconsistency of valuation models and processes may lead to inaccurate asset pricing. As a result, the Fund may be subject to the risk that when a security is sold in the market, the amount received by the Fund is less than the value of such security carried on the Fund's books.

*Market Price, Discount and Net Asset Value of Shares.* As with any stock, the price of the Fund's Shares fluctuates with market conditions and other factors. Shares of the Fund, a closed-end investment company, may trade in the market at a discount from their net asset value.

*Potential Yield Reduction.* An offering of Shares is expected to present the opportunity to invest in high yielding securities. This expectation is based on the current market environment for high yield debt securities, which could change in response to interest rate levels, general economic conditions, specific industry conditions and other factors. If the market environment for high yield debt securities changes in a manner that adversely affects the yield of such securities, the offering of Shares could cause the Fund to invest in securities that are lower yielding than those in which it is currently invested. In addition, even if the market for high yield debt securities continues to present attractive investment opportunities, there is no assurance that the Fund will be able to invest the proceeds of an offering of Shares in high yielding securities or that other potential benefits of the offering will be realized. An offering of Shares could reduce the Fund's current dividend yield if the Fund is unable to invest the proceeds of the offering in securities that provide a yield at least equal to the current dividend yield.

*Market Risk.* The market value of an instrument may fluctuate, sometimes rapidly and unpredictably. These fluctuations, which are often referred to as "volatility," may cause an instrument to be worth less than it was worth at an earlier time. Market risk may affect a single issuer, industry, commodity, sector of the economy, or the market as a whole. Local, regional or global events such as war, acts of terrorism, the spread of infectious illness or other public health issues, recessions, or other events could have a significant impact on a fund and its investments. Market risk is common to most investments — including stocks, bonds and commodities — and the mutual funds that invest in them. The performance of "value" stocks and "growth" stocks may rise or decline under varying market conditions — for example, value stocks may perform well under circumstances in which growth stocks in general have fallen.

Bonds and other fixed income securities generally involve less market risk than stocks and commodities. However, the risk of bonds can vary significantly depending upon factors such as the issuer's creditworthiness and a bond's maturity. The bonds of some companies may be riskier than the stocks of others.

An outbreak of coronavirus (COVID-19) that was first detected in China in December 2019 developed into a global pandemic that has resulted in numerous disruptions in the market and has had significant economic impact leaving general concern and uncertainty. The COVID-19 pandemic has affected, and other pandemics and epidemics that may arise in the future, could affect, the economies of many nations, individual companies and the market in general in ways that cannot necessarily be foreseen at the present time. In addition, the effect of infectious diseases in developing or emerging market countries may be greater due to less established health care systems. Health crises caused by the COVID-19 pandemic may exacerbate other pre-existing political, social and economic risks in certain countries. As a result, the extent to which the pandemic may negatively affect a fund's performance or the duration of any potential business disruption is uncertain.

*Anti-Takeover Provisions.* The Charter and By-laws contain provisions limiting the ability of other entities or persons to acquire control of the Fund. These provisions may be regarded as "anti-takeover" provisions. These

**Credit Suisse Asset Management Income Fund, Inc.**  
**Fund Summary (unaudited) (continued)**  
December 31, 2024

provisions could have the effect of depriving the shareholders of opportunities to sell their Shares at a premium over prevailing market prices by discouraging a third party from seeking to obtain control of the Fund in a tender offer or similar transaction.

**Senior Securities**

The following table sets forth information regarding the Fund's outstanding senior securities as of the end of each of the Fund's last ten fiscal years, as applicable.

Year Ended 12/31	Aggregate Amount Outstanding	Asset Coverage per \$1,000 of Indebtedness <sup>1</sup>
2024	\$57,000,000	\$3,855
2023	\$52,500,000	\$3,974
2022	\$60,500,000	\$3,379
2021	\$58,500,000	\$4,070
2020	\$56,500,000	\$4,162
2019	\$60,250,000	\$4,021
2018	\$70,750,000	\$3,373
2017	\$46,000,000	\$5,075
2016	—	—
2015	—	—
2014	—	—
2013	—	—

<sup>1</sup> Asset coverage means the ratio that the value of the Fund's total assets (including amounts borrowed), minus liabilities other than borrowings, bears to the aggregate amount of all borrowings.

**Trading and Net Asset Value Information**

The following table shows for the quarters indicated: (1) the high and low sale prices of the Fund' shares of common stock ("Common Shares") at the close of trading on the NYSE American; (2) the high and low NAV per Common Share; and (3) the high and low premium/(discount) to NAV at which the Fund's Common Shares were trading at the close of trading (as a percentage of NAV).

Fiscal Quarter Ended	Price		Net Asset Value		Premium/(Discount) To Net Asset Value	
	High	Low	High	Low	High	Low
March 31, 2022	\$3.50	\$2.94	\$3.43	\$3.18	2.04%	(8.41)%
June 30, 2022	\$3.07	\$2.59	\$3.24	\$2.79	(2.15)%	(9.44)%
September 30, 2022	\$3.00	\$2.65	\$3.01	\$2.69	3.15%	(4.48)%
December 31, 2022	\$2.80	\$2.41	\$2.81	\$2.67	1.82%	(10.41)%
March 31, 2023	\$2.80	\$2.46	\$2.90	\$2.73	0.00%	(10.55)%
June 30, 2023	\$3.05	\$2.57	\$2.85	\$2.79	8.16%	(8.87)%
September 30, 2023	\$3.05	\$2.59	\$2.89	\$2.82	6.27%	(8.48)%
December 31, 2023	\$3.13	\$2.51	\$2.96	\$2.75	5.74%	(8.73)%
March 31, 2024	\$3.09	\$2.95	\$2.98	\$2.93	4.07%	(1.01)%
June 30, 2024	\$3.09	\$2.84	\$2.98	\$2.91	4.04%	(3.14)%
September 30, 2024	\$3.12	\$2.90	\$3.03	\$2.96	3.65%	(2.03)%
December 31, 2024	\$3.09	\$2.85	\$3.03	\$2.96	2.49%	(3.72)%

On December 31, 2024, the per Common Share NAV was \$2.97 and the per Common Share market price was \$2.89, representing a 2.69% discount to such NAV.

**Credit Suisse Asset Management Income Fund, Inc.**  
**Fund Summary (unaudited) (continued)**  
December 31, 2024

---

Common Shares of the Fund have historically traded at both a premium and discount to NAV.

Shares of closed-end investment companies listed for trading on a securities exchange frequently trade at a discount from NAV, although in some cases they may trade at a premium. The market price may be affected by trading volume of the shares, general market and economic conditions and other factors beyond the control of the closed-end fund. The foregoing factors may result in the market price of the shares being greater than, less than or equal to NAV. The Board has reviewed the structure of the Fund in light of its investment objective and policies and has determined that the closed-end structure is in the best interests of the shareholders. As described above, however, the Board will review periodically the trading range and activity of the Fund's Common Shares with respect to its NAV and the Board may take certain actions to seek to reduce or eliminate any such discount. Such actions may include open market repurchases or tender offers for the Common Shares at NAV or the possible conversion of the Fund to an open-end investment company. There can be no assurance that the Board will decide to undertake any of these actions or that, if undertaken, such actions would result in the Common Shares trading at a price equal to or close to net asset value per share.

### Summary of Fund Expenses

The following table and example are intended to assist you in understanding the various costs and expenses directly or indirectly associated with investing in Common Shares of the Fund. Some of the percentages indicated in the table below are estimates and may vary.

#### Shareholder Transaction Expenses

Sales Load (as a percentage of offering price)	1.50% <sup>(1)</sup>
Offering Expenses (as a percentage of offering price)	0.00%
Dividend Reinvestment Plan Fees	\$5.00 <sup>(2)</sup>

#### Annual Operating Expenses (as a percentage of average net assets attributable to the Fund's Common Shares)

Management Fees <sup>(3)</sup>	0.50%
Interest Expense on Borrowed Funds <sup>(4)</sup>	1.99%
Other Expenses	0.47%
<b>Total Annual Operating Expenses</b>	<b>2.96%</b>

<sup>(1)</sup> Represents the estimated commission with respect to the Fund's Common Shares being sold in this offering, which the Fund will pay to JonesTrading in connection with the sales of Common Shares effected by JonesTrading in this offering. While JonesTrading is entitled to a commission of between 1.50% and 3.00% of the gross sales price for Common Shares sold, with the exact amount to be agreed upon by the parties, the Fund has assumed, for purposes of this offering, that JonesTrading will receive a commission of 1.50% of such gross sales price. This is the only sales load to be paid in connection with this offering.

<sup>(2)</sup> The Fund bears ongoing expenses associated with the Plan which are included in "Other Expenses." There is no service fee payable by Plan participants for dividend reinvestments; however, shareholders are subject to other transaction costs associated with the Plan. Actual costs will vary for each participant depending on the return and number of transactions made. For Plan participants that elect to make voluntary cash purchases, Plan participants must pay a service fee of \$5.00 per transaction. Plan participants will also be charged a pro rata share of the brokerage commissions for all open market purchases (\$0.03 per share as of December 2024). In addition, if a Plan participant elects by written notice to the Plan administrator to have the plan administrator sell part or all of the shares held by the Plan administrator in the participant's account and remit the proceeds to the participant, the participant will also be charged a service fee of \$5.00 for each sale and brokerage commissions of \$0.03 per share (as of December 2024). See "Dividend Reinvestment and Cash Purchase Plan."

<sup>(3)</sup> UBS AM receives from the Fund, as compensation for its advisory services, a fee, computed weekly and payable quarterly at an annual rate of 0.50% of an average weekly base amount which, with respect to each quarter, is the average of the lower of (i) the stock price (market value) of the Fund's outstanding shares and (ii) the Fund's net assets, in each case determined as of the last trading day for each week during the relevant quarter.

<sup>(4)</sup> The Fund may use leverage through borrowings, the costs of which are borne by holders of Common Shares of the Fund. The Fund currently borrows under a credit facility.

**Credit Suisse Asset Management Income Fund, Inc.**  
**Fund Summary (unaudited) (continued)**  
December 31, 2024

---

**Example**

An investor would pay the following expenses on a \$1,000 investment in the Fund, assuming (1) Total Annual Operating Expenses of 2.96%, (2) a Sales Load (commission) of \$15 and (3) a 5% annual return:

<u>One Year</u>	<u>Three Years</u>	<u>Five Years</u>	<u>Ten Years</u>
\$44	\$105	\$168	\$338

The “Example” assumes that all dividends and other distributions are reinvested at net asset value and that the percentage amounts listed in the table above under Total Annual Operating Expenses remain the same in the years shown. The above table and example and the assumption in the example of a 5% annual return are required by regulations of the SEC that are applicable to all investment companies; the assumed 5% annual return is not a prediction of, and does not represent, the projected or actual performance of the Fund’s Common Shares.

**The example should not be considered a representation of past or future expenses, and the Fund’s actual expenses may be greater than or less than those shown. Moreover, the Fund’s actual rate of return may be greater or less than the hypothetical 5% return shown in the example.**

Performance information current to the most recent month-end is available at [www.credit-suisse.com/us/funds](http://www.credit-suisse.com/us/funds).

**Credit Suisse Asset Management Income Fund, Inc.**  
**Dividend Reinvestment and Cash Purchase Plan (unaudited)**

---

Credit Suisse Asset Management Income Fund, Inc. (the “Fund”) offers a Dividend Reinvestment and Cash Purchase Plan (the “Plan”) to its common stockholders. The Plan offers common stockholders a prompt and simple way to reinvest net investment income dividends and capital gains and other periodic distributions in shares of the Fund’s common stock. Computershare Trust Company, N.A. (“Computershare”) acts as Plan Agent for stockholders in administering the Plan.

If your shares of common stock of the Fund are registered in your own name, you will automatically participate in the Plan, unless you have indicated that you do not wish to participate and instead wish to receive dividends and capital gains distributions in cash. If you are a beneficial owner of the Fund having your shares registered in the name of a bank, broker or other nominee, you must first make arrangements with the organization in whose name your shares are registered to have the shares transferred into your own name. Registered shareholders can join the Plan via the Internet by going to [www.computershare.com](http://www.computershare.com), authenticating your online account, agreeing to the Terms and Conditions of online “Account Access” and completing an online Plan Enrollment Form. Alternatively, you can complete the Plan Enrollment Form and return it to Computershare at the address below.

By participating in the Plan, your dividends and distributions will be promptly paid to you in additional shares of common stock of the Fund. The number of shares to be issued to you will be determined by dividing the total amount of the distribution payable to you by the greater of (i) the net asset value per share (“NAV”) of the Fund’s common stock on the payment date, or (ii) 95% of the market price per share of the Fund’s common stock on the payment date. If the NAV of the Fund’s common stock is greater than the market price (plus estimated brokerage commissions) on the payment date, then Computershare (or a broker-dealer selected by Computershare) shall endeavor to apply the amount of such distribution on your shares to purchase shares of Fund common stock in the open market.

You should be aware that all net investment income dividends and capital gain distributions are taxable to you as ordinary income and capital gain, respectively, whether received in cash or reinvested in additional shares of the Fund’s common stock.

The Plan also permits participants to purchase shares of the Fund through Computershare. You may invest \$100 or more monthly, with a maximum of \$100,000 in any annual period. Computershare will purchase shares for you on the open market on the 25th of each month or the next trading day if the 25th is not a trading day.

There is no service fee payable by Plan participants for dividend reinvestment. For voluntary cash payments, Plan participants must pay a service fee of \$5.00 per transaction. Plan participants will also be charged a pro rata share of the brokerage commissions for all open market purchases (\$0.03 per share as of December 2024). Participants will also be charged a service fee of \$5.00 for each sale and brokerage commissions of \$0.03 per share (as of December 2024).

You may terminate your participation in the Plan at any time by notifying Computershare or requesting a sale of your shares held in the Plan. Your withdrawal will be effective immediately if your notice is received by Computershare prior to any dividend or distribution record date; otherwise, such termination will be effective only with respect to any subsequent dividend or distribution. Your dividend participation option will remain the same unless you withdraw all of your whole and fractional Plan shares, in which case your participation in the Plan will be terminated and you will receive subsequent dividends and capital gains distributions in cash instead of shares.
